PHARMACY TECHNICIAN INSTRUCTOR CLINICAL TRAINING

LOCATION: VCU School of Pharmacy
Smith Building, Room 545, 410 North 12th Street,
Richmond, VA 23298

Dates: July 24-26, 2017

This program is designed for pharmacy technician course instructors and other clinical professions. Upon completion of the training participants will be able to:

1. Discuss the changing role of the pharmacy technicians.
2. Describe the role of pharmacy technicians in sterile and non-sterile compounding practices.
3. Align course outcomes, instructional strategies, and assessments.
4. Develop and utilize active learning strategies to encourage effective collaboration.
5. Demonstrate effective small group facilitation skills to promote participant engagement.
6. Define medical and pharmacy terminology and abbreviations in sterile and non-sterile compounding.
7. Illustrate Good laboratory Practice (GLP) as applied to 503A compounding in conventional pharmacy.
8. Demonstrate aptitude in pharmaceutical calculations as required in personalized compounding preparations.
9. Explain the non-sterile preparation procedures represented by commonly compounded dosage forms.
10. Describe the standards of practice and professional ethics for pharmacy technicians.
11. Discuss the alignment of PTCB Curriculum Guidelines, pharmacy technician instruction, and the PTCE exam.

Participants will be assigned to each of the following breakout sessions:

- Session A: Sterile Preparation
 - Session B: Non-Sterile Compounding
 - Session C: Active Learning Strategies
- Each three-hour breakout session will include didactic content and application exercises.
