

Bake Sale Fundraiser Anchor Papers

STUDENT A

Name: _____ Date: _____

I went backwards because we are trying to see how many cupcakes they started with so we can see times that by \$2.75 so we can see how much money they have.  So that we can see if they need more money or if they have more than they need.

Bake Sale Fundraiser

Brady and Jaquan were selling cupcakes together at a bake sale. They hope to make \$100 so they can both go on the band field trip to Washington, DC.

- In the first hour, Brady sold $\frac{1}{3}$ of the cupcakes and Jaquan sold $\frac{3}{8}$ of the cupcakes.
- During the second hour, they sold 2 cupcakes.
- During the third hour, they sold 75% of the remaining cupcakes.
- During the fourth hour, they sold the remaining 3 cupcakes.

If they sold each cupcake for \$2.75, will they make enough money to go on the field trip? If so, how much money would be left over for spending money? Explain how you know.

hour 1 - $\frac{1}{3} = 0.33$
 $\frac{3}{8} = 0.375$

hour 3 - 75%

hour 2 - 2

hour 4 - 3

14.330
 14.375
28.705

3 cupcakes = 25%

14 cupcakes sold

Brady 14.33
 Jaquan 14.375

$\frac{1}{3} + \frac{3}{8} = \frac{4}{12} + \frac{9}{12} = \frac{13}{12}$

$\frac{1}{3} = \frac{8}{24}$

$\frac{4}{24} \quad \frac{11}{24}$

$\frac{3}{24} \times 8 = \frac{24}{24}$

3, 6, 9, 12, 15, 18, 21, 24

$\frac{3}{24} \times 3 = \frac{9}{24}$

$\frac{9}{24} + \frac{11}{24} = \frac{20}{24}$

Bake Sale Fundraiser

Brady and Jaquan were selling cupcakes together at a bake sale. They hope to make \$100 so they can both go on the band field trip to Washington, DC.

- In the first hour, Brady sold $\frac{1}{3}$ of the cupcakes and Jaquan sold $\frac{3}{8}$ of the cupcakes.
- During the second hour, they sold 2 cupcakes. 14
- During the third hour, they sold 75% of the remaining cupcakes. 12
- During the fourth hour, they sold the remaining 3 cupcakes. 3:

If they sold each cupcake for \$2.75, will they make enough money to go on the field trip? If so, how much money would be left over for spending money? Explain how you know.

I tried to do 25% for each, it worked but I didn't find out the first one. If you want to know how I did it, it's right here.

STUDENT D

Bake Sale Fundraiser

Brady and Jaquan were selling cupcakes together at a bake sale. They hope to make **\$100** so they can both go on the band field trip to Washington, DC.

- In the first hour, Brady sold $\frac{1}{3}$ of the cupcakes and Jaquan sold $\frac{3}{8}$ of the cupcakes.
- During the second hour, they sold **2** cupcakes.
- During the third hour, they sold **75%** of the remaining cupcakes. = 12 cupcakes
- During the fourth hour, they sold the remaining **3** cupcakes.

If they sold each cupcake for **\$2.75**, will they make enough money to go on the field trip? If so, how much **money would be left over for spending money?**

Explain how you know.

\$100

$$1 \text{ hr} = \frac{1}{3} + \frac{3}{8} = \frac{4}{11} = 0.3675$$

hour = 14.33

33
• 375

$\frac{3}{8}$ is larger than $\frac{1}{3}$ so Jaquan sold more the 1st hour.

Jaquan: 14.375

2 hour = 14 cupcakes

$$\begin{array}{r} + 12 \\ 2 \\ \hline 14 \end{array}$$

3 hour =  = $\frac{3}{4}$ = 75%

4 hour = 3 cupcake ^{remaining} 25%

$$\begin{array}{r} 14.330 \\ + 14.375 \\ \hline 28.705 \end{array}$$

$$\frac{1}{3} + \frac{3}{8} = \frac{4}{24}$$

$$\frac{1}{3} = \frac{3}{8} +$$

I went backwards to get the total of the answers.

The hours went by 1ths so I had drawn some pictures to explain it more.

You have to add the fractions to gether & simplify to try & get you on the right path.

Bake Sale Fundraiser

Brady and Jaquan were selling cupcakes together at a bake sale. They hope to make \$100 so they can both go on the band field trip to Washington, DC.

- 48. In the first hour, Brady sold $\frac{1}{3}$ of the cupcakes and Jaquan sold $\frac{3}{8}$ of the cupcakes.
- 14. During the second hour, they sold 2 cupcakes.
- 12. During the third hour, they sold 75% of the remaining cupcakes.
- During the fourth hour, they sold the remaining 3 cupcakes.

If they sold each cupcake for \$2.75, will they make enough money to go on the field trip? If so, how much money would be left over for spending money? Explain how you know.

75% of 12 is 9 and if they sold that much they would have ended with 3

Since they got rid of 2 you would add two

3 | 6 9 12 15 18 21 24
8 | 16 24 32

$\frac{1}{3} + \frac{3}{8} = \frac{8}{24} + \frac{9}{24} = \frac{17}{24}$ is left over

12
+ 2

14

They have enough and 32 dollars spending money

Bale Sale Fundraiser Anchor Papers

STUDENT F Continued

I figured that if I sold $\frac{17}{24}$ I have $\frac{7}{24}$ left then if ~~the~~ broken up is 10, 7 twos that means all of them are twos.

I have 48 cupcakes at the beginning

I'm doing 48×2.75 because each 48 is worth 2.75

$$48 \times 2.75 = 132 \quad \cancel{\$} 132$$
