Virginia English Standards of Learning Curriculum Framework 2010

Introduction

The 2010 English Standards of Learning Curriculum Framework is a companion document to the 2010 English Standards of Learning and amplifies the English Standards of Learning by defining the content knowledge, skills, and understandings that are measured by the Standards of Learning assessments. The Curriculum Framework provides additional guidance to school divisions and their teachers as they develop an instructional program appropriate for their students. It assists teachers in their lesson planning by identifying essential understandings, defining essential content knowledge, and describing the intellectual skills students need to use. This supplemental framework delineates in greater specificity the content that all teachers should teach and all students should learn.

Each topic in the *English Standards of Learning* Curriculum Framework is developed around the Standards of Learning. The format of the Curriculum Framework facilitates teacher planning by identifying the key concepts, knowledge, and skills that should be the focus of instruction for each standard. The Curriculum Framework is divided into three columns: Understanding the Standard; Essential Understandings; and Essential Knowledge, Skills and Processes. The purpose of each column is explained below.

Understanding the Standard

This section includes background information for the teacher. It contains content that may extend the teachers' knowledge of the standard beyond the current grade level. This section may also contain suggestions and resources that will help teachers plan lessons focusing on the standard.

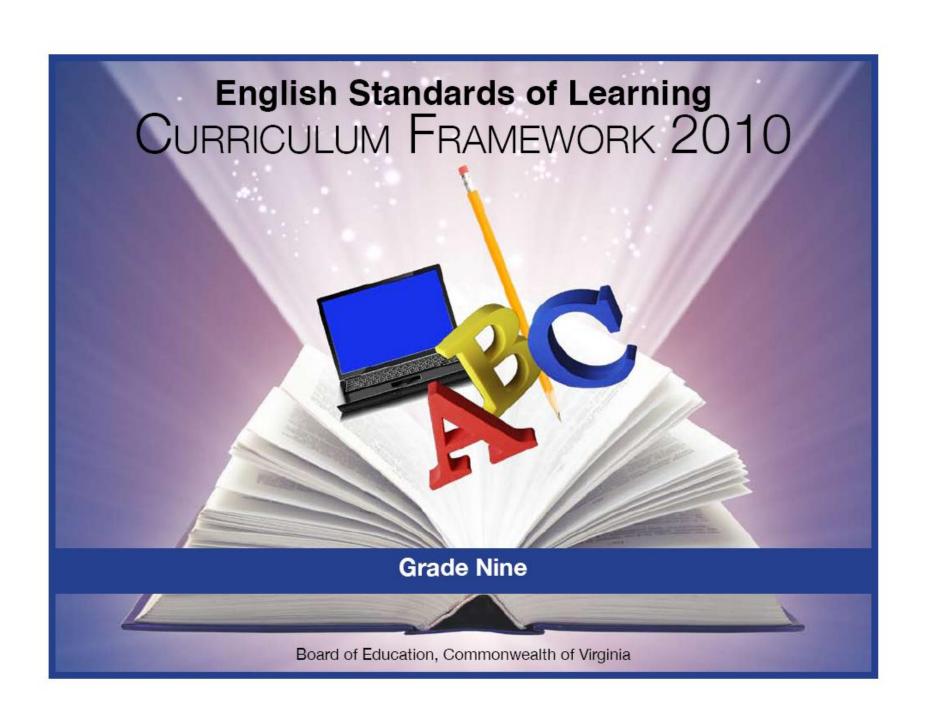

Essential Understandings

This section delineates the key concepts and ideas that all students should grasp to demonstrate an understanding of the Standards of Learning. These essential understandings are presented to facilitate teacher planning.

Essential Knowledge, Skills, and Processes

Each standard is expanded in the Essential Knowledge, Skills, and Processes column. What each student should know and be able to do in each standard is outlined. This is not meant to be an exhaustive list nor a list that limits what is taught in the classroom. It is meant to identify the key knowledge, skills, and processes that define the standard.

The Curriculum Framework serves as a guide for Standards of Learning assessment development. Assessment items may not and should not be a verbatim reflection of the information presented in the Curriculum Framework. Students are expected to continue to apply knowledge, skills, and processes from Standards of Learning presented in previous grades as they build expertise in English.

At the ninth-grade level, students will develop interpersonal communication skills as well as those skills required for more formal public speaking opportunities. They will continue to develop proficiency in making planned oral presentations independently and in small groups. They will continue to develop media literacy by producing, analyzing, and evaluating auditory, visual, and written media messages.

 Students will develop media literacy by studying various media components and messages. Students will also recognize that all media messages are constructed and that to understand the whole meaning of the message they can <i>deconstruct</i> it, looking at the following attributes: Authorship (Who constructed the message?) Format (This is not just the medium being used but also how the creators used specific elements for effect, i.e., color, sound, emphasis on certain words, amateur video, kids' voices.) Audience (Who is the person or persons meant to see the message? How will different people <i>see</i> the message?) Content (This is not just the visible content but the embedded content as well which includes underlying assumptions of values or points of view; facts and opinions may be intermixed.) Purpose (Why is the message being sent—is it meant to persuade, inform, entertain, sell, or a combination of these?) 	All students should evaluate how special effects are employed in a multimedia message to persuade the viewer. comprehend persuasive language and word connotations to convey viewpoint and bias.	 To be successful with this standard, students are expected to create and publish media messages, such as public service announcements aimed at a variety of audiences and with different purposes. recognize that persuasive techniques are used to convince viewers to make decisions, change their minds, take a stand on an issue, or predict a certain outcome, such as: ad hominem – means "to the man" does not argue the issue, instead it argues the person; red herring – is a deliberate attempt to divert attention; straw man – creates the illusion of having refuted a proposition by substituting a similar yet weaker proposition (the "straw man"); begging the question – assumes the conclusion is true without proving it; circular argument; testimonial – uses famous people to endorse the product or idea; ethical appeal – establishes the writer as knowledgeable; emotional appeal – appeals strictly to emotions often used with strong visuals; and logical appeal – is the strategic use of logic, claims, and evidence. identify and evaluate word choice in the media. investigate the use of bias and viewpoints in media. describe the effect of persuasive messages in the media on the audience. identify public opinion trends and possible causes. identify and analyze choice of information in the media and distinguish between fact and opinion.

		 identify and analyze sources and viewpoints in the media. analyze information from many different print and electronic sources. identify basic principles of media literacy: media messages are constructed; messages are representations of reality with values and viewpoints; each form of media uses a unique set of rules to construct messages; individuals interpret based on personal experience; and media are driven to gain profit or power. identify key questions of media literacy: Who created the message? What techniques are used to attract attention? How might different people react differently to this message? What values, lifestyles and points of view are represented in, or omitted from, this message? What is the purpose of this message?

At the ninth-grade level, students will apply knowledge of word origins, derivations, and figurative language to extend vocabulary development in authentic texts. They will be introduced to literary works from a variety of cultures and eras, and they will apply knowledge of literary terms and forms to their reading and writing and to analyses of literature and other printed materials. Students will continue to develop their reading comprehension skills through utilizing strategies to identify formats, text structures, and main ideas. They will apply these skills across the content areas, including history and social science, science, and mathematics. When selecting texts, teachers will consider appropriateness of subject and theme as well as text complexity.

 The intent of this standard is that students will increase their independence as learners of vocabulary. Students will use prefixes, suffixes, roots, derivations, and inflections of polysyllabic words to determine meaning and relationships among related words. Teachers should use a study of cognates (words from the same linguistic family) to enhance vocabulary instruction. Cognates can occur within the same language or across languages, e.g., night (English), nuit (French), Nacht (German), nacht (Dutch), nicht (Scots), natt (Swedish, Norwegian), nat (Danish), raat (Urdu), nátt (Faroese), nótt (Icelandic), noc (Czech, Slovak, Polish). To be successful with this standard, students are expected to use word structure to analyze and relate words. use roots or affixes to determine or clarify the meaning of words. recognize that words have nuances of meaning and that understanding the connotations may be necessary to determine the appropriate meaning. demonstrate an understanding of idioms. use prior reading knowledge and other study to identify the meaning of literary and classical allusions. interpret figures of speech (e.g., euphemism, oxymoron) in context and analyze their role in the text. analyze connotations of words with similar denotations. use context (e.g., the overall meaning of a sentence, paragraph, or text; a word's position or function in a sentence) as a clue to the meaning of a word or phrase. identify and correctly use patterns of word changes that indicate different meanings or parts of speech (e.g., conceive, conception, conceivable). consult general and specialized reference materials (e.g., dictionaries, thesaurus). demonstrate understanding of figurative language, word relationships, and connotations in word meanings.

 Students will plan, compose, revise, and edit writing in a variety of forms and for a variety of audiences and purposes. Writing will encompass narrative, expository, persuasive, and analytical forms. Students develop as writers by participating in a process for writing — prewriting, organizing, composing, revising, editing, and publishing. Students should have practice writing for shorter time frames as well as extended time frames. 	 All students should understand that writing is a process. understand the importance of audience, purpose and point of view when writing. recognize the importance of maintaining a formal style and objective tone in academic writing. understand that the function of a thesis statement is to focus on the purpose of writing. 	 To be successful with this standard, students are expected to use prewriting strategies and organize writing. plan and develop organized and focused written products that demonstrate their understanding of composing, written expression, and usage/mechanics and that reflect an appropriate audience and purpose. demonstrate the purpose of writing as narrative, persuasive, expository, or analytical. apply narrative techniques, such as dialogue, description, and pacing to develop experiences or characters. write using a clear, focused thesis that addresses the purpose for writing. provide an engaging introduction and a clear thesis statement that introduces the information presented. write clear, varied sentences, and increase the use of embedded clauses. use specific vocabulary and information. use precise language to convey a vivid picture. develop the topic with appropriate information, details, and examples. arrange paragraphs into a logical progression using appropriate words or phrases to signal organizational pattern and transitions between ideas.

At the tenth-grade level, students will develop their persuasive, expository, and analytical writing skills. They will synthesize information to support a thesis, provide elaboration, and organize ideas logically. They will demonstrate understanding by applying a writing process in developing written products. They will revise writing for clarity of content and edit for correct use of language, sentence formation, punctuation, capitalization, and spelling as part of the writing process.
