INTRODUCTION

The *History and Social Science Standards of Learning Curriculum Framework 2008*, approved by the Board of Education on July 17, 2008, is a companion document to the 2008 *History and Social Science Standards of Learning for Virginia Public Schools*. The Curriculum Framework amplifies the Standards of Learning by defining the content understandings, knowledge, and skills that are measured by the Standards of Learning assessments. The Curriculum Framework provides additional guidance to school divisions and their teachers as they develop an instructional program appropriate for their students. It assists teachers in their lesson planning by identifying the essential content understandings, knowledge, and intellectual skills that should be the focus of instruction for each standard. Hence, the framework delineates with greater specificity the content that all teachers should teach and all students should learn.

The Curriculum Framework consists of at least one framework page for every Standard of Learning. Each of these pages is divided into four columns, as described below:

Essential Understandings

This column includes the fundamental background information necessary for answering the essential questions and acquiring the essential knowledge. Teachers should use these understandings as a basis for lesson planning.

Essential Questions

In this column are found questions that teachers may use to stimulate student thinking and classroom discussion. The questions are based on the standard and the essential understandings, but may use different vocabulary and may go beyond them.

Essential Knowledge

This column delineates the key content facts, concepts, and ideas that students should grasp in order to demonstrate understanding of the standard. This information is not meant to be exhaustive or a limitation on what is taught in the classroom. Rather, it is meant to be the principal knowledge defining the standard.

Essential Skills

This column enumerates the fundamental intellectual abilities that students should have—what they should be able to do—to be successful in accomplishing historical and geographical analysis and achieving responsible citizenship.

The Curriculum Framework serves as a guide for Standards of Learning assessment development; however, assessment items may not and should not be verbatim reflections of the information presented in the Curriculum Framework.

STANDARD WHI.1a, b, c, d, e, f

The student will improve skills in historical research and geographical analysis by

- a) identifying, analyzing, and interpreting primary and secondary sources to make generalizations about events and life in world history to 1500 A.D. (C.E.);
- b) using maps, globes, artifacts, and pictures to analyze the physical and cultural landscapes of the world and interpret the past to 1500 A.D. (C.E.);
- c) identifying major geographic features important to the study of world history to 1500 A.D. (C.E.);
- d) identifying and comparing political boundaries with the locations of civilizations, empires, and kingdoms from 4000 B.C. (B.C.E.) to 1500 A.D. (C.E.);
- e) analyzing trends in human migration and cultural interaction from prehistory to 1500 A.D. (C.E.);
- f) analyzing the impact of economic forces, including taxation, government spending, trade, resources, and monetary systems on events to 1500 A.D. (C.E.).

The various skills identified in this standard are cited, as applicable, in the "Essential Skills" columns of the charts throughout this curriculum framework. These skills will be assessed on the Standards of Learning test, and teachers should incorporate them into instruction throughout the year.

STANDARD WHI.2a

The student will demonstrate knowledge of early development of humankind from the Paleolithic Era to the agricultural revolution by a) explaining the impact of geographic environment on hunter-gatherer societies.

Essential Understandings	Essential Questions	Essential Knowledge	Essential Skills
Life in early hunter-gatherer societies was shaped by their physical environment.	How did physical geography influence the lives of early humans?	Homo sapiens emerged in east Africa between 100,000 and 400,000 years ago. Homo sapiens migrated from Africa to Eurasia, Australia, and the Americas. Early humans were hunters and gatherers whose survival depended on the availability of wild plants and animals.	Use maps, globes, artifacts, and pictures to analyze the physical and cultural landscapes of the world and interpret the past. (WHI.1b) Identify major geographic features important to the study of world history. (WHI.1c) Analyze trends in human migration and cultural interaction. (WHI.1e)

The beginning of agriculture, including permanent settlements, was a major step in the advance of civilization.	How did the beginning of agriculture and the domestication of animals promote the rise of settled communities?	Societies during the Neolithic Era (New Stone Age) • developed agriculture (domesticated plants) • domesticated animals • used advanced tools • made pottery • developed weaving skills.	Use maps, globes, artifacts, and pictures to analyze the physical and cultural landscapes of the world and interpret the past. (WHI.1b) Analyze trends in human migration and cultural interaction. (WHI.1e)

STANDARD WHI.2d

Essential Understandings	Essential Questions	Essential Knowledge	Essential Skills
Archaeologists continue to find and interpret evidence of early humans and their lives.	How does archaeology provide knowledge of early human life and its changes?	Archaeologists study past cultures by locating and analyzing human remains, settlements, fossils, and artifacts. Archaeologists apply scientific tests, such as carbon dating, to analyze fossils and artifacts. Stonehenge is an example of an archaeological site in England that was begun during the Neolithic Age and completed during the Bronze Age. Aleppo and Jericho are examples of early cities in the Fertile Crescent studied by archaeologists. Çatalhöyük is an example of a Neolithic settlement currently under excavation in Anatolia.	Identify, analyze, and interpret primary and secondary sources to make generalizations about events and life in world history. (WHI.1a) Use maps, globes, artifacts, and pictures to analyze the physical and cultural landscapes of the world and interpret the past.
